

Bertin Exensor Signs Framework Agreement with FMV for TMM Systems

Bertin Exensor, a Swedish subsidiary of the French technology group Bertin Technologies, has signed a significant framework agreement with the Swedish Defence Materiel Administration (FMV). The agreement concerns the delivery of additional TMM (Tactical Modular Ground Sensor System) in all configuration types, marking an important milestone for the company.

The framework agreement spans three years with an option to extend it up to seven years. While the exact value of the agreement remains confidential, it encompasses a substantial number of systems.

This agreement allows both FMV and all branches of the Swedish Armed Forces to place orders under the contract, ensuring that Sweden has access to advanced and reliable sensor systems for many years to come.

- This agreement marks a significant achievement for us, demonstrating our ability to deliver high-quality solutions and strengthening our collaboration with FMV and the Swedish Armed Forces," says Pontus Agerteg, Head of Sales Nordic at Bertin Exensor.

Bertin Exensor has a long history of delivering advanced sensor systems to FMV and the Swedish Armed Forces. The company has previously successfully delivered TMM systems to, among others, the Swedish Home Guard, which has enhanced unit capabilities and protection through advanced sensor technology.

With this new framework agreement, Bertin Exensor continues to solidify its position as a leading supplier of defense systems in Sweden and abroad.

ABOUT BERTIN EXENSOR

BERTIN EXENSOR is a world-leading supplier of Unattended Ground Sensor (UGS) systems. Designed by BERTIN EXENSOR, the Flexnet UGS system combines intelligence collected by seismic, acoustic, magnetic, and TI sensors to detect, identify and classify threats and targets. Flexnet is perfectly suited to military and civilian applications such as force protection, Intelligence, Surveillance, Reconnaissance (ISR), and monitoring of critical assets and sensitive areas. Bertin Exensor now counts over 60 employees, with facilities located both in Sweden and the United-Kingdom. Since 2017, the company is part of the French group Bertin Technologies, a well-known actor in the Defense & Security market.
