

Bertin Exensor Signs Five-Year Framework Agreement with the Swedish Armed Forces

Bertin Exensor has entered into a new framework agreement with the Swedish Armed Forces (Försvarsmakten) for spare parts supply, equipment maintenance, and technical system support (RMT) for the Tactical Modular Ground Sensor System (TMM). The agreement spans five years with an option for a further two-year extension.

The framework agreement is between the Swedish Armed Forces and Bertin Exensor, with call-off options for both the Swedish Armed Forces and the Swedish Defence Materiel Administration (FMV). The agreement covers all TMM systems currently in use within the Swedish Armed Forces.

In addition to spare parts and corrective maintenance, the agreement also includes capability adjustments throughout the system's lifespan to ensure they remain relevant in response to changing capability requirements.

"The agreement is crucial for us as an industry to contribute to the efficient use of the equipment, which will result in high availability for the units" says Pontus Agerteg, Head of Sales Nordic at Bertin Exensor.

ABOUT BERTIN EXENSOR

BERTIN EXENSOR is a world-leading supplier of Unattended Ground Sensor (UGS) systems. Designed by BERTIN EXENSOR, the Flexnet UGS system combines intelligence collected by seismic, acoustic, magnetic, and TI sensors to detect, identify and classify threats and targets. Flexnet is perfectly suited to military and civilian applications such as force protection, Intelligence, Surveillance, Reconnaissance (ISR), and monitoring of critical assets and sensitive areas. Bertin Exensor now counts over 60 employees, with facilities located both in Sweden and the United-Kingdom. Since 2017, the company is part of the French group Bertin Technologies, a well-known actor in the Defense & Security market.
