

Carbon Reduction Plan

Supplier name: **Bertin Exensor Limited**

Publication date: **January 2026**

Commitment to achieving Net Zero

Bertin Exensor Limited is committed to achieving Net Zero emissions by **2050** at the latest.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025	
Additional Details relating to the Baseline Emissions calculations.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO_{2e})
Scope 1	0
Scope 2	21
Scope 3 (Included Sources) <ul style="list-style-type: none"> - Upstream transportation and distribution - Waste generated in operations - Business travel - Employee commuting 	1 496

- Downstream transportation and distribution	
Total Emissions	1 517 tCO₂e

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0
Scope 2	21
Scope 3 (Included Sources) <ul style="list-style-type: none"> - Upstream transportation and distribution - Waste generated in operations - Business travel - Employee commuting - Downstream transportation and distribution 	1 496
Total Emissions	1 517 tCO₂e

Emissions reduction targets

Over the next 5 years we plan to implement further measures to reduce our carbon footprint:

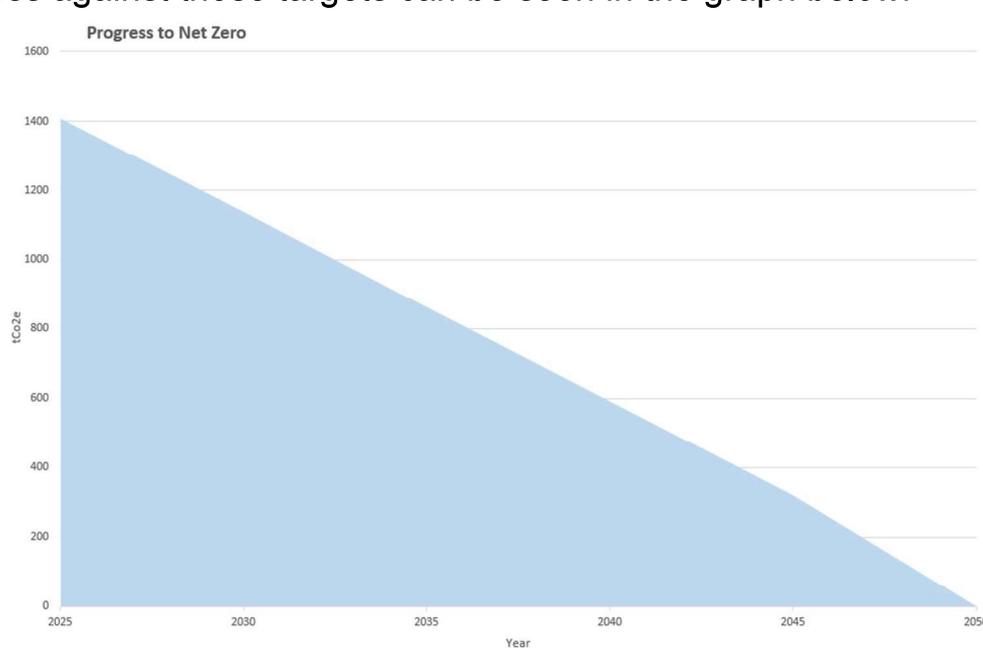

- Reduce vehicle-related emissions by replacing company vehicles with Electric vehicles. This will reduce CO₂ emissions by up to 4tonnes per year.

- Switch to a renewable energy tariff at the end of our current contract in 2028
- Reduce business travel by air, rail, and road through implementing a sustainable travel policy
- Educate our people to reduce their carbon impact both in and outside of work

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **137 tCO₂e** by **2031**. This is a reduction of **25%**

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented in the past 10 years, before the baseline was implemented.

- Implementation of ISO14001
- Fitted LED lighting throughout the premises
- Embedding Climate risks into our Strategic Planning
- Install electric vehicle charging points on our property to support staff and make electric vehicles a viable option.

- Adopt a reduce, re-use, recycle methodology where possible.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
